# Why need Community

From decades of years, lots of companies and concept are using us as a users and associate, we were spend our saving of whole life and trust them for a good returns in form of interest. also spends time as work for them as a associates. But some how the most of companies breach our trust and we were lost our hard earned money and time.

We have to decide & make our own community/group globally, where we can help to each other without any company/owner/office, and we can make money without any investment and product selling.

# About

**Planetway is not a company nor Organization**, it's an open community of programmers and endless fundraisers, where programmers donate their skill & created this platform, With the help of Planetway platform, any individual, NGO or organization can create their donation request landing page and start raising funds for their personal or professional cause.

If you are a programmer, you can also become a part of our open community, come and join us, donate your skill.

# Solution !

From the decades of years we are already using community power for our financial solution, it's known as BC, Community, Self Help Group, Samooh, Society etc.

In this methods few numbers of peoples (10-25) united in a group and make a donation of decided amount by each person per month. One person collect the fund from each person called Community manager, now all member's decided who's in financial need, then all collected fund is donated to one single person. This same process is repeat for the next month and some another member get help from collected fund.

**Problems :** In this procedure, here is few demerits in this system :

- number of persons are limited,
- each member have to donate each month,
- insecurity and trust breach from manager,
- if few member unable to donate than it's payable by manager or remain members etc.

**Solution :** We have created Global Community and resolved the problem of regular community where we can raise endless fund through our own community by helping each other. In this community all members will get

- ✓ Emergency fund on demand
- ✓ Daily Global financial support
- ✓ Community expansion benefits
- ✓ Recurring System &
- ✓ 200% Contribution Support

**Legal :** Donation are always legal in all countries, each individual is free to donate his/her fund or assets and an individual fundraiser or organization is free create campaign and can receive the donation/contribution from endless peoples/donors for any social/individual/professional cause. The taxation liability is paid by receiver as per country Law. This process is called crowd funding.

### What Is Crowdfunding and How Does it Work?

Crowdfunding is a way to raise small amounts of money for a project or cause from a large group of donors. It's called CROWDFUNDING because it arises from the collective effort of a broad range of supporters.

### How Does Crowdfunding Work?

Crowdfunding can be used to raise funds for a variety of different organizations, projects, people, or causes. For instance, some start-up's rely on crowdfunding to raise capital for their budding businesses. Non-profits might use crowdfunding to meet a particular fundraising goal. And individuals might crowdfund to survive financial setbacks (such as medical expenses) or support a personal project.

Because most crowdfunding campaigns run online, they're often shared via social media and dedicated crowdfunding platforms. This means there's an opportunity for crowdfunding campaigns to reach a huge audience.

Planetway is based on Crowdfunding

## About Cryptocurrency !

A **cryptocurrency** is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many **cryptocurrencies** are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers.

**ETH is a cryptocurrency. It is scarce digital money that you can use on the internet – similar to Bitcoin.**

It's really yours

A large, sleek, silver Starship is shown in orbit above Earth's cloud-covered surface. The ship is angled diagonally across the frame, with its nose pointing towards the top left. A smaller, cylindrical object, likely a booster, is seen trailing away from the main ship towards the bottom right. The background is the deep blue of space and the white and blue of the Earth's atmosphere.
